In re: Removal of Junk from Shriver's
Corner Site

Dear Mr. Steuteville:

I wish to confirm in writing a telephone conversation that was had with you on September 9, 1986, in the late afternoon. You had called me in my position as Solicitor to the Township of Straban, Adams County, Pennsylvania, to determine if the Township had any opposition, other than the recommendations of the Environmental Protection Agency, to the removal of junk from what is commonly known as the Shriver's Corner Toxic Waste Site.

I indicated to you in the telephone conference that the Township, on my advice, has not followed the procedure laid out in the Straban Township Junkyard Ordinance requiring the removal of junk from the unlicensed Shriver's Corner Site. I repeatedly told the Township, at public meetings and in the presence of Merle Hankey, Jr., that my interpretation of communication with the Environmental Protection Agency was that the junk should not be disturbed or removed until the EPA had approved a plan for such removal. It is only because of my advice, based on the recommendation of the Environmental Protection Agency, that the Township has directed those persons with authority over the toxic waste site to not remove the junk.

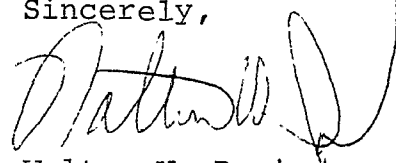

If the Environmental Protection Agency were to indicate to the Township of Straban that a removal plan met EPA's requirements and satisfaction, then the Township of Straban would not oppose the removal of junk from the Shriver's Corner Site which is presently an unlicensed junkyard, and because of its status as being unlicensed, should have the

junk removed from it.

Sincerely,

Walton V. Davis

In re: Removal of Junk from Shriver's Corner Site

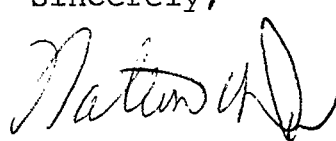

Dear Mr. Steuteville:

After our most recent telephone conversation I indicated to you that a copy of the junk yard application submitted by Fred Shealer would be transmitted to you to confirm whether the proposed site is on the land shown to you by Mr. Shealer. Enclosed please find photocopies of the application and a portion of a draft submitted identifying the site.

It is my understanding that Mr. Shealer indicated that the junked cars would be stored in that area where the words "junkyard site" are written, and that the cars would not be placed on the other side of the dotted line towards what has been identified as the lagoon site.

Please let us know if this is the same area shown to you by Mr. Shealer when you were on the land, and the site which the EPA does not now feel represents any health hazard if junked cars are stored thereon.

Sincerely,

Walton V. Davis
